STAP-Sponsored Discussion
Thursday, 18 December 1980

Topic: STAP/DIA Interface [redacted] 25X1
STAP Participants: [redacted] 25X1
Other Participants: Dr. Jack Vorona, Assistant Vice Director
for Scientific and Technical Intelligence, DIA
Time and Place: 1600-1645, [redacted] McLean, VA 25X1

1. The purpose of the meeting was to foster greater STAP/DIA cooperation and to find areas of common ground. Interface is difficult because they have had their own S&T Panel and feel obligated to go to them with problems. There are, however, a number of issues which are of common concern and agreement was made to keep each other informed regarding them. Among these were SAFE, Secure Communications, S&T Cycles, ELINT, and NIE 11-12. Dr. Vorona offered to provide a briefing on [redacted] for the 8-9 January 1981 meeting of STAP. [redacted] 25X1
25X1

2. The DIA S&T Panel meets quarterly for two days. There are three or four subpanels which meet more frequently and which are responsible for specific topics. In the future, papers produced by these groups will be made available to STAP and STAP papers will be sent to Dr. Vorona's office. [redacted] 25X1
